THE LIVING WIRE

IFP is a very dynamic company.

This is possible due to its origins, identity and continuous commitments. Its development and growth determination guarantee there is always great focus on the products' high quality.

Founded in the year 2000 thanks to the cooperation of 3 Italian companies which are well known in the market, **IFP is always one step ahead with the production cycles**, thanks to its technological innovations which make IFP stand out when searching for alternatives and solutions both in terms of structure and machineries.

IFP's main aim is a wire of superb quality starting from the choice of the raw materials, product certifications, following norms and regulations which are fundamental to pinpoint the best possible production cycles. The final outcome is monitored closely in order to make IFP's wire strongly reliable and guaranteed based on the excellent production criteria applied, granting an overall satisfaction for every demand.

IFP patents, phosphates and galvanizes both wire rods and wires.

The Pian Camuno and Pianico production sites (both close to Brescia) occupy approximately 18.000mq of covered area.

There are different lines running in parallel with continuous working cycles, producing at the same time phosphated, galvanized and zinc aluminium material.

The company overall production capacity is of approximately 40.000 tons per year and has a diameter range from 1.20mm to 17mm, granting to the company a very interesting worldwide market position in terms of size and range offered.

Alloys, heat treatment, phosphating, zinc and zinc aluminium coating provide a very complete offer to the market where the company today is well recognized in terms of availability, research and reliability.

IFP's objective is to always aim at the top.

A daily commitment at all levels is necessary to reach the objectives, IFP is always searching to guarantee better ductility and resistance and continuously looking for improved material characteristics.

In fact the market experience, know how and passion for the details are characteristics which are shared amongst the employees in IFP, people working together always striving for the best.

The IFP wire is a "living" product in which are gathered competence, know how and uniqueness.

IFP is always researching and aiming to obtain the optimal product and provide the best possible quality in order to stand out and be at the top.

It is a challenging task but rewarding and carried out with perseverance.

The acquired technical knowledge is the key to its success, and the assistance offered together with the complementary services guarantee a very solid and reliable structure.

Always ready to evaluate and pursue new market opportunities, open to discussions for improvement and assist customers and potential customers to review together custom made projects directly.

Every production experience in IFP is unique, one of a kind and different. The company dynamism makes IFP the ideal reference and the best partner for a continuous and solid working relation.
